PROJECTS

INDIVisit Tourism Web-App. INDIVisit is a centralized platform designed using HTML5, CSS3 (Bootstrap), and JavaScript. With its streamlined interface, the website enhances productivity and promotes a conducive learning environment, ultimately improving the journey. ([Try it here](#))

Shoplane E-Commerce. An e-commerce site for a online shopping for cloths and accessories, I made this site for my project as an intern. I build this site using HTML5, CSS3, and JavaScript. ([Try it here](#))

Face Recognition Based Attendance System. This project is a face recognition-based attendance system that uses OpenCV and Python. The system uses a camera to capture images of individuals and then compares them with the images in the database to mark attendance.

ACHIEVEMENTS

- Best Programmer award, A. R. Kalsekar Polytechnic [View](#)
- Received recognition for exceptional problem-solving skills by resolving a critical system issue that led to a 25 percent reduction in downtime and improved overall system stability.
